

Online Ordering & Stock Control

BGC Studio offers you two simple ways to increase the profitability of your outlet. Let us help you provide the best card ranges to your customers, whilst making you life easier.

You can offer your customers the very best choice of greeting cards, whatever the season. Let us do all the hard work and your cards will be delivered direct to your door. All you need do is choose the process that works best for you.

Option 1

Place your order today with BGC Studios – you pick your designs and we pack and ship them! **Call us on 0161 871 4452 for further details or email your order to sales@bgcstudios.co.uk or fax it to us on 0161 601 3502**

Option 2

Introduce a professionally planned stock control unit – tell us the space you have to work with and we will pick and pack the ranges for you! You can then simply display them in your outlet.

If you already operate stock control units, you can still take advantage of the above options. Just let us know how many stock control units you have (or need) and we will provide the profit-maximising plan that meets your requirements.

BGC Stock Control units are available for Everyday Ranges as well as Christmas and Spring Season. This increasingly popular system generates additional revenue, but requires minimal input leaving you with valuable time to spend with your customers.
